

product name **HUMIXFORT**

Humixfort H40, which is enriched by POTASSIUM LIGNO SULPHANATE, is a special fertilizer for rooting & micro flora life of soil. It helps to chelate the existing plant nutrient in the soil and make easier them to absorb by roots. Humixfort H40 has a special addition to increase the humic and fulvic acid ratio that is mostly Fulvic acid. Soil nutrient reactions are accelerated by Humixfort H40. Humixfort H40 is a good messenger to say the soil "everything is under control, essential nutrients are with me to go on the life". As Extra Enzymes and Bacteria mixture is added during production process to activate the product.
